Dracut, MA – Maugel Architects announced construction is nearing completion at Circle Health’s new Dracut facility. The 27,000sf, three-story medical office building, located at the corner of Broadway and Loon Hill Road, is scheduled to be completed by late summer.

Circle Health Dracut will provide the community with urgent care, patient services, physician offices, and diabetes and endocrinology specialty services. The first floor includes a 10-room Circle Health Urgent Care and a Lowell General Hospital Patient Service Center with services for x-ray, ultrasound, and lab/ blood draw. OB/GYN Associates of the Merrimack Valley and primary care physicians Riverside Medical Group will be located on the second level.

The top floor will contain a Diabetes Management Center and the Lowell Diabetes & Endocrine Center. The two centers will have a centralized reception and waiting area and a large educational room that will be used to host programs to educate the community.

“Construction on Circle Health Dracut is coming along beautifully. We are very excited for the Dracut community and the scheduled opening in late summer,” said Colby Cavanagh, architect for Circle Health at Maugel Architects. “It is always a pleasure to work with the Circle Health team. We are looking forward to our next project together in Circle Health Tewksbury, a new 14,000sf, single-story medical building that will be constructed at the corner of Main Street and

Victor Drive.

In addition to urgent care, the facility will house primary care physician offices and a patient services center. Construction is scheduled to be completed in early 2019.

In addition to Circle Health, other team members include Equity Alliance, Dellbrook|JKS Construction, TFMoran, Design Day Mechanicals, and Pristine Engineers.

Maugel previously designed Circle Health outpatient centers in Westford and Billerica.
